

## DIVEX

DivEx is an accessory to the explosion venting devices VENT PRO.

DivEx limits the opening angle of the VENT PRO and directs the blast pressure wave and flame into the required safe space.

Doing so reduces the hazardous area around the explosion venting device, increases the usable operational space, and provides optimal explosion protection.

## Advantages

- Significant reduction of the safety zone
- Economical solution to secure production, plant and infrastructures
- Safer transportation routes for people and vehicles
- Retrofitting existing applications enhances safety
- Maintenance-free and long-lasting - stainless steel design

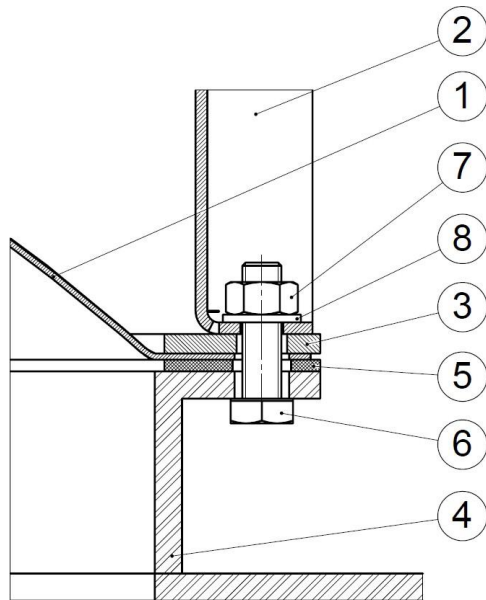

Explosion venting without DivEx

Explosion venting with DivEx

## DIVEX INSTALLATION ON TO VENT PRO

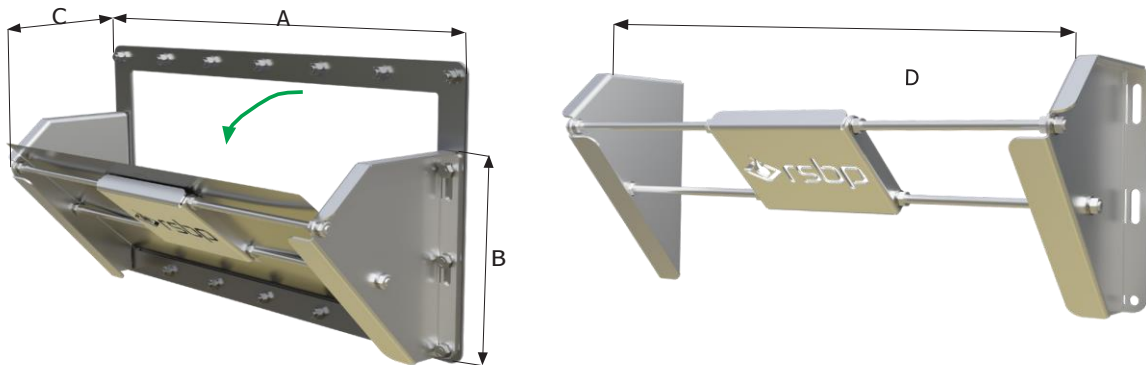

Position	Components	Pcs
1	VENT PRO	1
2	DivEx	1
3	Upper frame	1
4	Protected equipment 1)	1
5	Flange gasket	1
6	Screw <sup>2)</sup>	see <sup>3)</sup>
7	Nut <sup>2)</sup>	see <sup>3)</sup>
8	Washer <sup>2)</sup>	see <sup>3)</sup>

<sup>1)</sup> The flange of the protected device for VENT PRO installation must meet the requirements of the standard EN ISO 13920-BE and must be sufficiently rigid. In case of installation on an insufficiently rigid device, the flange must be reinforced additionally. The hole diameters in the flange of the protected device for M10 screws are  $\varnothing 12$  mm (EN 20273).

<sup>2)</sup> The connecting material is galvanized (strength 8.8) or stainless steel (strength A2-70).

<sup>3)</sup> The quantity according to the UM VENT PRO table of technical parameters
